Program:- wap to find a sum two times by using friend function.

```
#include<iostream.h>
#include<conio.h>
class time
{
    int hr,min,s;
    public:
    friend void sum(int,int,int)

    void sum_1(int a,int b,int c)
    {
        hr=a;
        min=b;
        s=c;
    }
    void sum_disp()
    {
        cout<<"The sum of hour:min:sec: "<<endl;
    }
};

void sum_2(time p, time q)
{
    p.a = p.a + q.a;
    q.b = p.b + q.b;
}

void main()
{
    int a,b,c;
    clrscr();
    time obj1,obj2,obj3;
    cout<<"Enter the 1st slot of hour:min:sec :"<<endl;
    cin>>a>>b>>c;
    obj1.sum_1(a,b,c);
    cout<<"Enter the 2nd slot of hour:min:sec :"<<endl;
    cin>>a>>b>>c;
    obj2.sum_1(a,b,c);
```

```
    obj3 = obj1.time + obj2.time;  
    void sum_disp();  
}
```
